MINISTER FOR INDUSTRIES
21 MAY 1951
GOVERNMENT OF MADRAS

5743
DEPUTY SECRETARY TO GOVERNMENT
23 MAY 1951
DEVELOPMENT DEPARTMENT

Short Title:- Prayer for the introduction of Dipl[illegible] Course in Mining & Metallurgy in the school of [illegible], Bellary.

Honourable Sir,

Rayalaseema is rich in a variety of minerals, and large and extensive deposits of major and minor minerals occur in almost all the four districts of Rayalaseema, barring the Sandur General Mining Company at Sandur, where has been no organised effort to exploit the mineral ~~resources of the area. Much of the mining work carried on~~ by individuals borderson surface scraping, and no systematic work is not carried on.

As the development of both cottage, medium and big industries in the Rayalaseema depends directly or the development of the mines, and the supply of such highly useful ores as Iron, Manganese, Base for colours of various shades, Ochres, Barytes-snow white and coloured, Galena, Arcentite, Calcite, Corundum and various others. though there are rich deposits and enterprising individuals are not wanting to invest their monies and exploit the natural resources, one great handicap in the direction is the lack of technical Personnel ie qualified Geologists, and holders of Mining Diplomas or Degrees. Under the new rules of mining one of the conditions precedent to the renewal of Mining Certificates is that every such applicant should have secured the services of qualified certificate-holders in mining. As qualified men are not available and applicants are unable to secure their services for guidance and direction, their Certificates have not been renewed.

In the interests of mining work and as its sequel, the development of the economic resources of Rayalaseema, there is a distict need for introducing the Course of Mining & Metallurgy in the Polytechnics in Bellary, and thus making available a number of trained men in the said subject.

I pray that you be so pleased, Hon'ble Sir, as to take steps for the introduction of the Diploma Course in Mining & Metallurgy in the Polytechnics at Bellary.

Thanking You,
Yours Faithfully,
G. Narayanaswamy
Advocate, Member, Food Committee,
Bellary District.

Copy of letter No. 60 dated the 9th August, 1951 from the Indian School of Mines and Applied Geology, Dhanbad

---

Subject:- Education - Industrial - Polytechnics - Introduction of a Diploma course in Mining and Metallurgy - Regarding.

Reference:- Your No. 3575-C.1/51 dated 17-7-51.

I send herewith a prospectus of this Institute which will help you in preparing a report. In this connexion I should like to point out that 60 graduates and Diploma holders in Mining Engineering are likely to be coming out from this Institution as well as from the Banaras Hindu University every year. The number should be enough to meet the present needs of the country. Similarly there are at least 2 well-equipped institutions training students in Metallurgy namely the B.H.U. and the Bengal Engineering College. As far as I know there is always a little surplus in the turn out of Metallurgists than what the industry can absorb. I do not therefore think it necessary to start any new centre for training in Mining and Metallurgy. In these branches of study young men are trained for a fixed profession and indiscriminate starting of new institutions without adjudging the scope of adequate employment would be an inadvisable step.

Memorandum No 57432-D.I/51-14 dt 14-3-52

Sub:- Education - Industrial - Introducing a Diploma Course in Mining and Metallurgy in the Rayalseema Polytechnic, Bellary.

p.3cf Ref:- (1) From the D.I.t.c, Letter No 3575-C.1/57 dated 30th August 1957.

p.7cf (2) This Dept. Memorandum No 57432-D.I/57-4 dated 8-9-1957 addressed to Collectors and Copy sent to the D.I.t.c.

vide p.4NF The Govt consider that the mineral wealth of this Country is either not exploited, or wastefully exploited by owners who rely on themselves. From the reports received from the Collectors it is observed that there is dearth of mining Engineers and that private mines do not employ qualified Engineers. If sufficient number of qualified men were readily available, presumably they would Probably have been appointed by the mine owners. With abroad increase in mining operations all over the Country particularly in the Rayalseema the demand for qualified men will certainly increase and as such there is scope to start a new Course in mining and metallurgy in the South, as all the institutions that impart such training are located in the Northern India. The D.I.t.c is accordingly requested to submit necessary detailed proposals for the introduction of a Diploma Course in mining and metallurgy in the Rayalseema Polytechnic, Bellary with full financial implications involved.

THIRD ASST. SECRETARY TO GOVERNMENT :: DEVELOPMENT DEPARTMENT :: 26 MAR 1952

No.3575-C.1/51 dated 21st March 1952.

Dev 34525.D.I/52 27.3.52

Sir,

Sub: Mining - Training of students in practical mining- Introduction of a Diploma course in the Rayalaseema Polytechnic, Bellary - Proposals -Submitting.

THIRD ASST. SECRETARY TO GOVERNMENT :: DEVELOPMENT DEPARTMENT :: 27 MAR 1952

Ref: Govt. Memorandum No.57432-D.I/51-4, Development dated 8th September 1951. b/7 above

not rec'd

With his letter Rc,No.2347/51 dated 25th October 1951, the Development Commissioner,Rayalaseema Development Board has forwarded to me a copy of the following resolution passed by the Board at its meeting held on the 13th October 1951 with a request to submit to Government detailed proposals to implement the Board's recommendation from next academic year.

M

> "The Board considered that there is no need to depute candidates from Rayalaseema to Dhanbad for training as suggested by Sri P.V.Subba Rao at present and resolved to recommend to Government that a Diploma course in Mining may be introduced from next year in the Rayalaseema Polytechnic,Bellary on the model of the training in the Occupational Institute,Mysore".

I accordingly submit the following proposals for the introduction of a Mining Diploma Course in the Rayalaseema Polytechnic,Bellary for the consideration of Government.

Scope of Training: The Diploma course in Mining will be of three years' duration followed by one year practical training. On completion of three years' theoretical training in the Polytechnic, candidates will be examined by the Technological Diploma Examination Board, successful students being awarded diplomas after completing the prescribed practical training.

Qualification for admission: The minimum qualification for admission to the course will be a pass in S.S.L.C. having selected the pre-academic course with Composite Mathematics or the Pretechnological course with composite mathematics with eligibility for admission to the University courses of studies.

Age: The candidates should not be less than 18 years and produce a certificate to the effect that they are physically fit.

Strength: The annual admissions will be limited to 20.

Fees: A tution fee of Rs.72/- per session will be charged, payable in two half yearly instalments in July and January.

Scholarships: Scholarships of the value of Rs.25/- ~~per~~ each per-mensem are payable to 5 students in each year of the Diploma course.

Equipment: The requirements for the diploma course have been estimated at present at about Rs.2½ lakhs.

The following staff will be needed and it will be necessary to employ men with practical experience. As Mining Technicians are

12

few in this countty it may be necessary to offer higher starting sslary than the minimum of the grades to attract the right sort of men.

1. One Head of Section (Gazetted) on Rs.230/- --410/- p.m.
2. Two Lecturers in Geology, Mining Engineering and Mining Survey on Rs.180-5-200-10-240/-
3. Two Assistant Lecturers on Rs.90-5-180/- each for Physics, Chemistry and Mathematics.

- The following are the financial implications of the scheme:--

	I Year. Rs	II Year. Rs	III Year. Rs
Non-Recurring:			
Equipment ..	1 lakh	1 lakh	½ lakh.

Recurring:

Staff as detailed in prepara ..	Rs.12464- 0-0	
Dearness Allowance and House Rent Allowance.	2295- 0-0	
Apparatus and Materials	9500- 0-0	
Scholarships at Rs.25/- each for 5 students in each year course.	4500- 0-0	
Travelling allowance	1000- 0-0	
Other contingencies	5000- 0-0	
	Rs. 34759- 0-0	Rs. or 34800/-

If Government approve the above scheme, I request early orders to enable necessary equipment being obtained during 1952-53 to start the course commencing in July 1953.

#95 above

B

I submit that the proposals for the introduction of a Mining and Metallurgy Course in the Rayalaseema Polytechnic, Bellary are with reference to the Government Memorandum referred to in para (I) above bearing in mind the Scheme of such training in the Jayachamrajendra Occupational Institute, Bangalore. A reference to the Government Memorandum on the subject was omitted by oversight. Fees, scholarships, equipment etc., proposed in the scheme conform to those sanctioned for other diploma Courses in the Rayalaseema Polytechnic, Bellary. As regards staff, a slight modification has been effected on that sanctioned for other diploma courses in Polytechnics to suit the special nature of the new course, having in view the staff employed in the Occupational Institute, Bangalore and the staff already available in the Polytechnic.

Pl. examine.

C.P.
21.5."

...

In the Memorandum presented to H.M.(L.R.) on p.1 c.f. Sri G.Nagabushanam, Advocate and member, Food Committee, Bellary has proposed the introduction of a Diploam Course in Mining and Metallurgy in the Rayalaseema Polytechnic, Bellary. The matter was referred to the D.I.& C.who in turn consulted the Principal, Indian School of Mines, Dhanabad. The Principal, Indian School of Mines, Dhanabad has advised that in view of the adequacy of the existing institutions to supply sufficient number of Mining Engineers, it is not necessary to start any new centre for training in Mining and Metallurgy. The D.I.& C.fully agrees with the above view of the Principal, Indian School of Mines, Dhanabad and states that it is neither necessary nor expedient to introduce a diploma course in Mining and Metallurgy in any of the Polytechnics. In the circumstances stated above, it is for orders whether Sri G.Nagabushanam, Advocate, Bellary may be informed that Govt. have carefully considered his suggestion but are unable to agree to it.

To A.S.

With ref. to the orders of the Secy. at 'A' on p.1 above, all Dt.Collrs. were addressed to furnish the necessary information. From the replies received from the Collectors, it is seen that in the districts of Kistna, Bellary, Salem and Tirunelveli, there is only one private mine which employs qualified Engineers while in the district of Tiruchirapalli, two private firms viz., Fertilisers and Chemicals (Travancore) Ltd., and Dalmia Cement Co., employ qualified Geologists. The Collrs. of Cuddapah, Nilgiris, Nellore, Malabar, S. Kanara and Madurai have reported that there are no qualified mining Engineers in their districts, while the Collectors of Kurnool, Vishakhapatnam, E. Godavari and Bellary have stated that there are not sufficient number of mining engineers in their districts. The other Collectors have stated that there are no private mines in their districts which employ qualified Engineers. Thus it will be seen that there are not many private mines which employ qualified Engineers and that there is a dearth of qualified mining Engineers in the State. But there seems to be no sufficient justification to start a new course in Mining and Metallurgy in the Rayalaseema Polytechnic, Bellary. There is already the Indian School of Mines and Applied Geology at Dhanabad, and in addition there are two other well equipped institutions training students in Metallurgy, namely the Benares Hindu University and the Bengal Engg. College. According to the Principal, Indian School of Mines and Applied Geology, Dhanabad, there is always a little surplus in the turn out of metallurgists from the above Institutions over and above the needs of the Country and that there is therefore no necessity

to start any new centre for training in Mining and Metallurgy. The D.I.G. fully agrees with the above views of the Principal, Indian School of Mines and Applied Geology, Dhanbad. In the circumstances stated above, it is for orders whether the suggestion at 'K' on p.3 above will be agreed to.

From the Report of the Coltes it is seen that there is dearth of mining engineers & that private mines do not employ qualified engineers. It is not clear whether the owners of private mines do not like to employ qualified mining engineers. If sufficient number of qualified men were readily available, I presume, they would have been appointed & must mine owners. With alround increase in mining operations all over the Country, particularly in the Raniganj seams, the demand for qualified men will certainly increase & as such there is scope to start a New Course in mining & metallurgy in the South as all the institutions for such training are in the Northern India. The DGM may be asked to estimate the cost of opening such a Course & forthwith forward proposals

I am inclined to agree with J.S. the mineral wealth of this country is either not exploited, or wastefully exported by owners who rely on themselves. Under the Rules, proper staff has to be employed but we have agreed not to enforce this, as such staff is not available. We may ask D I T C for proposals for introducing the course

Dev - D.I

The proposal in this file relates to the introduction of a Diploma Course in Mining and Metallurgy in the Rayalaseema Polytechnics, Bellary. In May 1951, Sri G. Nagabushanam, Advocate, and a member of the Food Committee, Bellary Dt., impressed upon Govt. the necessity for the introduction of a Diploma Course in Mining and Metallurgy in the Rayalaseema Polytechnic, Bellary. In Octr., 1951, the Rayalaseema Devt. Board., also passed a resolution to the same effect. On an examination of the proposal, the Govt. considered that the mineral wealth of the country was not exploited or wastefully exploited by owners, who rely on themselves. The Collectors were however consulted in the matter, and from the reports received from them, it was observed that there is dearth of Mining Engineers in this State and that private mines do not employ qualified Engineers. The Govt. also considered

B. f.1 ante

that with alround increase in mining operations all over the country particularly in the Rayalaseema, the demand for qualified men will certainly increase, and as such there is scope to start a new course in Mining and Metallurgy in the South, as all the institutions that impart such training are located in the Northern India. The D.I.& C. was accordingly asked to submit necessary detailed proposals for the introduction of a Diploma course in the Minining and Metallurgy in the Rayalaseema Polytechnic, Bellary with full financial implications involved. With his letter on pp.97-98 c.f., the Dir. has accordingly submitted necessary detailed proposals in the matter.

2. The scheme for the introduction of a Diploma course in Mining and Metallurgy in the Rayalaseema Polytechnic, Bellary has been drawn up by the D.I.& C. bearing in mind the scheme of such training in the Jayachamarajendra Occupational Institute, Bangalore. The scope of training, qualifications for admission, age of the candidates, strength, fees, scholarships equipment, staff etc., are as shown in the D.I.& C.'s letter on pp.97-98 c.f. and the Dir. has stated that all these items except staff conform to those sanctioned for other Diploma courses in the Rayalaseema Polytechnic, Bellary. No remarks are called for on these items. No details of equipment have however been given by the D.I.& C. As regards staff, the D.I.& C. has stated that a slight modification has been made on that sanctioned for other Diploma Courses in the Polytechnics to suit the special nature of the new course with due regard to the staff employed in the Occupational Institute, Bangalore and those available in the Polytechnics. As Mining Technicians are few in the Country, the D.I.& C.has stated that it may be necessary to offer higher starting salary than the minimum of the grades to attract right sort of people. This may be accepted. The financial implications of the proposal are as shown below:-

	I Year	II Year	III year.
Non-recurring: Equipment:	Rs.1 lakh.	Rs.1 lakh.	Rs. 1/2 lakh.
Recurring:	Rs. 34,800/- per annum - Vide details at 'M' on p.98 c.f.		

At a conference held on 2.4.52 of certain Secretaries to Govt., and Heads of Deptts., it has been decided that highest priority should be given for the introduction of a Diploma Course in Mining and Metallurgy in the Rayalaseema Polytechnic, Bellary. It is for orders whether the proposals submitted by the D.I.& C. for the introduction of the course will be supported in this Deptt.

Fin. may see for remarks.

16/4/52

16.4.52

this case may be treated as urgent as the D.I.& C. proposes to start the course if approved, even from July 1952.

23-4-52

J.S. 28/4 Fin

Finance (E.II) Department

The file deals with the proposal of the D.I & C. for the introduction of a diploma course in Mining and Metallurgy in the Rayalaseema Polytechnics, Bellary. In May 1951 Sri G.Nagabushanam, B.A.,B.L. a member of the Food Committee in Bellary district has pointed out that in the Rayalaseema though there are rich deposits and enterprising individuals are not wanting to invest their monies and exploit the natural resources one great handicap is the lack of technical personnel. He has also pointed out that under the new rules, one of the condition precedent to the renewal of mining certificates is that every such applicant should have secured the services of qualified certificate holders in mining and that as qualified men are not available the certificates have not been renewed. In the circumstances he has stressed the need for introducing the course of mining and metallurgy in the Polytechnics at Bellary. The matter was referred to the D.I & C. who in turn consulted the Principal, Indian School of mines, Dhanabad. The latter

has stated that the number of students coming out every year from the existing institutions is enough to meet the present needs of the country. Regarding metallurgy, the Principal has specifically stated that there is always a little surplus in the turnout of metallurgists than what the industry can absorb. He is of the view that it is not necessary to start any new centre for training in mining and metallurgy. He has pointed out that indiscriminate starting of new institutions without adjudging the scope of adequate employment would be an inadvisable step. The D.I & C. has entirely agreed with his views and has stated that it is neither necessary nor expedient to introduce a diploma course in mining and metallurgy in any of our Polytechnics. Devt, however, consulted all the Collectors regarding the sufficiency of mining engineers in the State and as to how many private mines employ qualified engineers. From the replies received, they came to the conclusion that there is a dearth of qualified mining engineers in this State and asked the D.I & C. to submit proposals for introducing the course of mining and metallurgy in the Polytechnics, Bellary. The D.I & C. has submitted a scheme for introduction from July 1953 at a cost of Rs 2½ lakhs non-recurring and Rs 34,800/- p.a. recurring. Certain equipments are to be bought during 1952-53. At a conference held on 2-4-52, of certain Secretaries to Government and Heads of Deptts. it has been decided that highest priority should be given to the scheme in question. Devt. propose to treat the proposal as urgent.

2. It is observed from the Collectors' reports that a number of firms are not now employing qualified engineers. But the point that how far this is due to paucity of qualified hands has not been properly examined. The Collector of Coimbatore, has pointed out that in a case the licencee has not employed a qualified engineer nor does he propose to employ one. The Collector of Bellary has stated that some private owners have not employed qualified engineers probably due to paucity of hands. The Collector of Srikakulam has reported that

≠ at pp9-87CF

several companies are not capable of appointing qualified engineers. As already pointed out, the Principal, Indian School of Mines and Applied Geology, Dhanabad, is of the view that the number of students coming out every year from the existing institutions is enough to meet the present needs of the country. In the circumstances, it is submitted that before opening a course of the proposed kind, the point at 'A' on page 8 above should be examined carefully as otherwise as pointed out by the Principal, Indian School of Mines and Applied Geology, it would be an 'inadvisable step' to open the proposed diploma course. In any case, proposals of this kind cannot be undertaken under the present financial conditions. Finance may advise that the proposal may be deferred If, however, Development press, they may be requested to examine the point referred to at 'A' on page 8 above carefully and send the file to this department for further remarks.

V-97-9RF

SBS 1/15/52 (Supdt enc.)

A

The proposals involves an extra cost of Rs 2½ lakhs non-recurring and Rs 34,600 per annum recurring. A scheme of this magnitude should be deferred in view of the present financial stringency. Attention is however invited to the portion marked 'X' in the Dev. Secy's note on P. 7 above where it is stated that at the Secretaries' Conference held on 21/4/52 it was decided to give the highest priority to this scheme. If in view of this decision, the proposals in this case are to be pursued, it may be brought forward as a Part II scheme for 1953-54. It is to be now to consider this as a Part II scheme for 1952-53 [The strength of staff and scales of pay proposed do not call for any remarks. The scales of pay proposed are the standard scales for Polytechnics]

To consider certain schemes recommended by the Regional Committee Board - Finance may also pursue.

Development(D1)Dept.

The proposals in this file relates to the introduction of a Diploma course in Mining and Metallurgy in the Rayalseema Polytechnic, Bellary. In May 1951, Sri G.Nagabhushanam, B.A.,B.L., a member of the Food Committee, Bellary District pointed out that in Rayalseema though there are rich deposits and enterprising individuals capable of investing their monies and exploiting the natural resources, ~~are~~ one great handicap is the lack of technical personnel. He also pointed ~~p~~out that under the new rules (of Mining) one of the conditions prescribed for the renewal of the mining certificates is that every applicant should have secured the services of qualified certificate holders in Mining and that as qualified men are not available, the certificates have not been renewed. In the circumstances stated above, Sri Nagabuhanam stressed the need for starting a Diploma course in Mining and Metallurgy in the Rayalseema Polytechnic, Bellary. The matter was referred to the Director of Industries and Commerce who in turn consulted the Principal Indian School of Mines, Dhanabad. The latter is of the view that the number of graduates and Diplomates in Mining Engineering coming out every year from the existing institutions is enough to meet the present needs of the country and that there is always a little surplus in the turn out of Metallurgists than what the industry can absorb. The Principal, Indian School of Mines therefore is not in favour of starting any new centre for training in Mining and Metallurgy and he has pointed out that indiscriminate starting of new institutions without adjudging the scope of adequate employment would be an inadvisable step. The Director of Industries and Commerce entirely agreed with the above views and has stated that it is neither necessary nor expedient to introduce a Diploma course in Mining and Metallurgy in any of the Polytechnics.

at the Conference of the Secretaries to Government and Heads of Departments to give highest priority to the scheme, the proposal is to be pursued, it may be brought forward as a Part II scheme for 1953-54, as it is now too late to consider it as a Part II scheme for 1952-53. It is for orders whether the suggestion of Finance will be agreed to, and the scheme ordered to be brought forward as a Part II scheme for 1953-54.

B. P. 9 a/m

12/5/52 J.S.

7/5/52

The points to be stressed in favour of the early introduction of the scheme are

i) There is great scope for effective and scientific exploitation of the mineral wealth of this State particularly in Rayalaseema area

ii) There is a dearth of qualified mining engineers for this purpose.

iii) There is no institution in the state of south to train mining engineers.

iv) The conference of Secretaries and Heads of depts presided over by H. E. (L. R.) in the previous decided that highest priority should be given for the introduction of a diploma course in mining and Metallurgy in the Rayalaseema Polytechnic.

This dept may perhaps press for including this for a Part II scheme for 1952-53 itself.
